BYOD Financial Hardship Program Application

Introduction

The BYOD Financial Hardship Program provides access to a device for students of families that are suffering from financial hardship and, as a result, are unable to purchase a 'Bring Your Own Device' for their student to utilise in the school environment and for education purposes.

To be approved to access the program, it must be proven that the student's family is suffering financial hardship. Accordingly, they will be requested to provide information on their financial situation in the form of the brief information requested below.

Additionally, once approved to access the program, the student will be required to provide a \$50 deposit. It is noted that should there be any damage to the device, this funding may be withheld in order to cover the costs associated with repairs to the device. If the device is returned in good working condition, the deposit will be refunded back into the parent/carer's bank account electronically.

Parents/Carers will also need to read/sign the BYOD Charter Agreement agreeing to the conditions and use of the device and be on an approved payment plan.

Information Required

Name of Parent/Carer:

Name of Student/s:
