Preamble

At Smithfield State High School, our underlying philosophy is to deliver world-class quality outcomes for our students.

Our teaching team has developed a learning culture that:

- engages young minds to meet the challenges of the future,
- personalises learning for all students, and
- encourages a culture of innovation.

Our teachers explicitly teach skills that will enable our students to become Literate Graduates. This skill set ensures students will be able to communicate, think critically, be creative, collaborate, develop their citizenship and their character in order to become productive citizens in the 21st century. Each faculty has embedded these skills within units of work.

Our teachers personalise the learning of our students to ensure all become adept at traditional literacy and numeracy skills. The delivery of literacy lessons for Year 7, 8 and 9 ensures students are supported as they develop their skills.

Our teachers work within a climate of innovation. They strive to create connected and interactive learning environments in order to develop students with an entrepreneurial mindset.

Timetable Structure

In order to deliver these world-class, quality outcomes, Smithfield State High School supports our teachers to deliver the Australian Curriculum through the following timetable structures:

Number of lessons per day: 5

Length of lessons: 55 minutes

Number of lessons per subject per week

Extension

¹ Year 7 and year 8 students select 4 electives to study (2 per semester)

² Year 7 and year 8 students study Digital Technologies for one semester and Philosophy in Action for one semester

³ Year 9 and year 10 students select 2 electives to study all year

⁴ Year 9 students study Literacy for one semester and Philosophy in Action for one semester

Reporting

Our teachers report on the progress of students 4 times per year, at the end of each term. Feedback is also provided to students and parents informally via feedback sessions, emails and phone calls, and formally during parent / teacher interviews.

Pathways to success at Smithfield State High School

At Smithfield SHS, we set high expectations for success for our students. We believe that all students need to be placed in programs that are suitable, challenging and relevant for them to meet their post school goals.

We offer three pathways:

Academic Excellence (Pathway #1)

Students who are on the Academic Excellence pathway are members of the Junior and Senior Learning Academy. These students will be obtaining an ATAR score in order to gain entry to university.

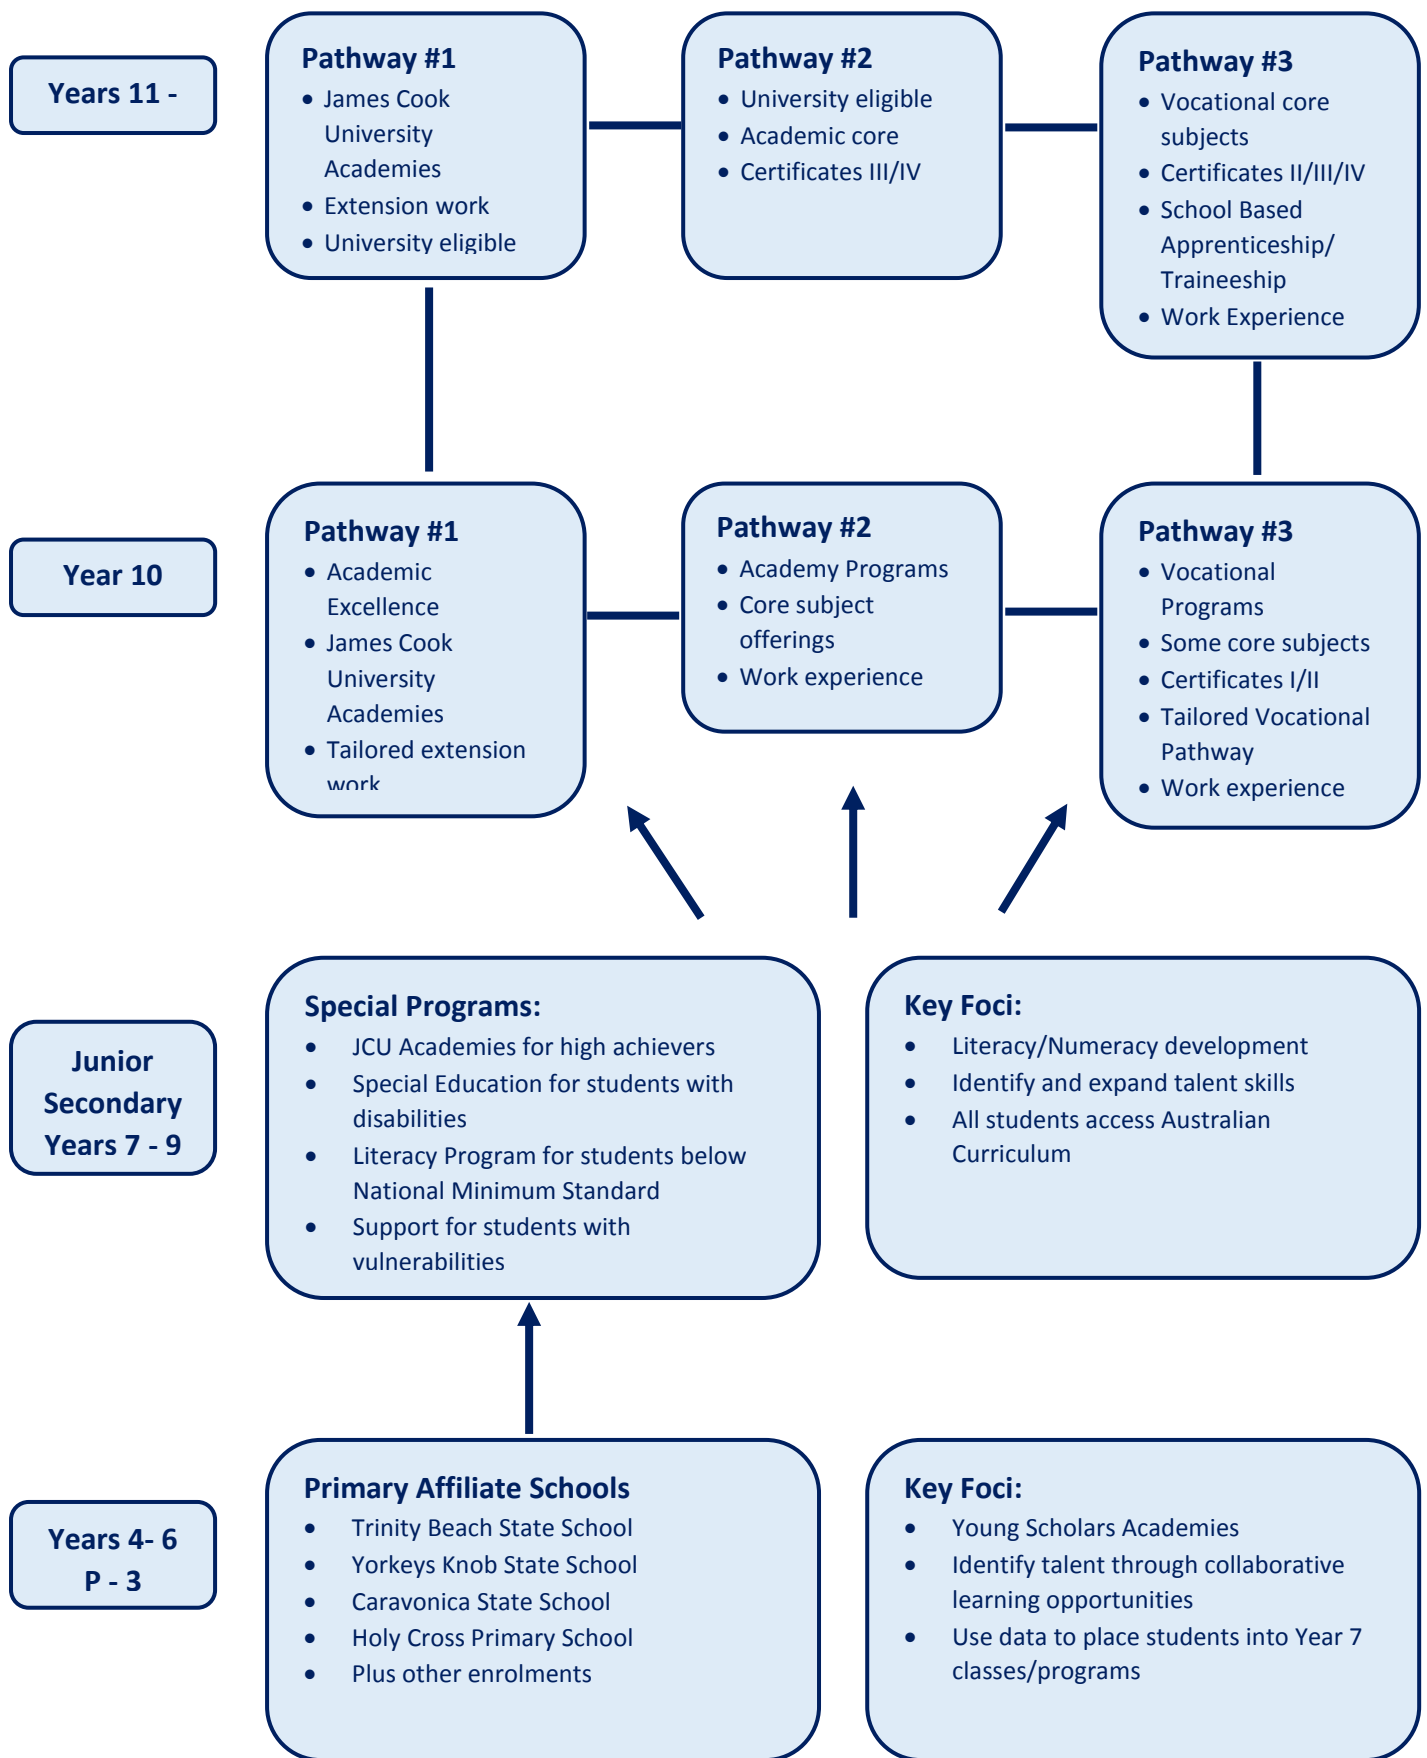

Academic General (Pathway #2)

Students who are on the Academic General pathway are eligible to gain entrance into university; they study core academic subjects in combination with certificate courses.

Vocational Education (Pathway #3)

Students who are on the Vocational Education pathway have the aptitude and mindset to acquire skills to demonstrate their competency to achieve certificate qualifications across a range of vocational areas.

Extension/Enrichment Programs

James Cook University (JCU) Learning Academy

The JCU Learning Academy aims to drive a culture of aspiration and success, with an expectation of high academic achievement. Students are supported in developing the attributes of a lifelong learner.

- Designed for high achieving students to support their intellectual development
- Fosters the academic, social and emotional growth of the student
- Philosophical and critical thinking
- Students participate in James Cook University workshops

Sports Academies

Soccer & Netball

The Sports Academies offer students a unique development program that provides specialization in conditioning, training and playing whilst simultaneously providing coaching and refereeing accreditation.

- A high performing program designed to create elite players with accredited skills
- Culture of discipline, goal setting, time management and leadership
- Provides access to further high performance coaching and facilities via our community partnerships

Jazz Academy

The Jazz Academy program offers a curriculum that provides a solid grounding in performance fundamentals with an emphasis on jazz stylings.

- Supported by jazz drummer John Morrison and vocalist Jacki Cooper
- Students receive personalized education and close support throughout their studies
- Students may choose to major in Instrumental, Composing and Song Writing, Vocal techniques, or a combination of areas

Instrumental Music

The Instrumental Music Program aims to provide tuition on a wide range of musical instruments for the purpose of enjoyment, expression and self-development. This program aims to create and enhance opportunities for positive achievement and promote excellence in performance. The following instruments are offered:

- **Woodwind** - Oboe, Bassoon, Flute, Bass Clarinet, Alto Saxophone, Tenor Saxophone, Baritone Saxophone.
- **Brass** - Trumpet, French horn, Trombone, Baritone/Euphonium, Tuba.
- **Strings** - Violin, Viola, Cello, Double Bass.
- **Percussion** - Drums, Mallet (tuned) and Concert (tune/un-tuned) Percussion in combination.

Global Tropics Future Project

The Global Tropics Future (GTF) Project is a collaboration between the Department of Education (DoE) and James Cook University (JCU) to prepare students for a future in the global topics.

The project provides selected students (GTF Young Scholars) in Years 5 - 9 with enrichment and enhancement opportunities within Science, Technology, Engineering and Mathematics (STEM). The purpose of the project is to build their knowledge and skills, to provide them with opportunities and experiences and to inspire them to follow a STEM pathway.

Literacy Project

Students in Years 7, 8 and 9 develop their literacy skills in a specialized lessons 3 times a week.

Duke of Edinburgh Award

The Duke of Edinburgh's Award provides a structured framework for Skills, Fitness, Volunteering and Adventurous Journey opportunities. Participants will gain additional QCE Points.

French Immersion

We offer students in Year 9 and 10 the opportunity to study Humanities via French Immersion.

This course saturates students in French for the first six weeks and, when base knowledge and understanding is evident, transitions to Humanities where the students study the same units of work as the rest of the cohort, however it is delivered in French.

Extra-curricular programs

Robotics/coding

Students with an interest in robotics and/or coding meet once a week after school. They are tutored by SSHS technology teachers and JCU lecturers and collaborate to design and program robotic devices.

Students have the opportunity 3 times per year to compete in the Regional QSITE Robotics Cup against other schools.

Drone club

Students who are interested in flying drones meet at lunch times to learn how to handle, program and fly drones safely. Students have opportunities to compete against other schools in drone competitions. The Smithfield State High School drone club is supported by the JCU She Flies initiative, which aims to improve the number of females in aviation careers.
